

Powering the renewable energy industry

RenewableWorks provides solar workforce solutions for utility, commercial and community projects across the U.S.

At RenewableWorks, we are on a mission to help reduce the nation's carbon footprint and build a more sustainable future. Backed by the resources of TrueBlue Inc. (NYSE: TBI), we provide solar workforce solutions for EPCs (Engineering, Procurement and Construction companies) and renewable energy contractors working on large utility, commercial and community solar projects.

Deep industry experience

As part of the TrueBlue family of brands, RenewableWorks leads the way in attracting, training and retaining the best solar professionals in the industry. Over the last decade, our tenured team of professionals has supported the construction of more than **23GW of new solar**. When you combine our deep industry experience with our commitment to safety, service and quality, you can have full confidence taking on new projects with RenewableWorks.

Inflation Reduction Act (IRA) project assistance

RenewableWorks has supported the installation of nearly 10GW of solar on IRA-compliant projects, bringing firsthand experience with the workforce and compliance requirements tied to IRA incentives. Backed by an approved apprenticeship program and certified payroll, audit and recordkeeping teams, we offer end-to-end workforce support. From determining accurate employee classifications to supporting apprentice hour and ratio requirements, we work closely with our partners to help promote compliance and keep projects moving forward with confidence.

Dedicated onsite presence

We know proactive communication is crucial. That's why we offer onsite support for large-scale solar construction projects. Experienced in HR, safety and workforce compliance, our onsite service teams provide hands-on support throughout every phase of the project. From managing time tracking, hiring and safety orientations to coordinating weekly project calls, supporting IRA compliance, handling injury reporting and claims management, and promoting employee retention, our teams help keep your workforce engaged, informed and aligned with project goals.

If you're looking for expert solar construction services, turn to RenewableWorks today

Start-to-finish services

- Land survey and preparation
- Pile driving
- Racking assembly
